Projects

Personal Portfolio

- To display my learning journey
 - Planning & Design
 - SEO & Optimization,Launch & Updates,Website Development
- Skills Developed: HTML, CSS, Javascript, Bootstrap

JioCinema-Clone

- The goal was to recreate the user experience of JioCinema using React, showcasing my front-end skills through a responsive OTT platform clone with modern UI/UX and clean code architecture.
 - Analyzed the original JioCinema UI to understand its layout, navigation, and design aesthetics.
 - Home Page Carousel with auto-scrolling featured content and filterable rows by genres like Action, Comedy, and Romance.
- Skills Developed: HTML, CSS, NodeJs, Javascript, React.js, ExpressJs, MongoDB

Weather Forecasting

- The goal was to build a responsive, user-friendly weather app that delivers real-time updates using APIs, helping users plan their day with accurate and accessible data.
 - Researched modern weather apps, designed a clean layout, and integrated a weather API for real-time data—ensuring a smooth, responsive experience across devices.
 - Real-time weather data using API integration for temperature, humidity, wind speed, and conditions.
- Skills Developed: HTML, CSS, Javascript, API
